

# Azadul Islam

## Back end developer

I am a dedicated web developer with over 4 years of experience, specializing in back-end development using PHP, Laravel, CodeIgniter, and Python Django. I have practical experience working in a startup environment as well as on freelance projects, where I developed scalable, client-focused web applications.

I have a strong grasp of object-oriented programming principles and a solid understanding of the PHP MVC framework structure.

While I have front-end knowledge through learning Vue.js, my core interest and long-term focus remain in back-end engineering.

## Work Experience

### Full Stack Web Developer (Remote)

*Fitlynk, Dubai*
